SUMMARY

MERN Stack Developer with 2+ years of experience turning complex requirements into clean, scalable web applications. I work comfortably across the full stack from crafting responsive React interfaces to wiring up Node.js/Express APIs and integrating cloud deployments. Known for writing maintainable code, shipping on time, and reducing friction for the teams I work with. Cut bug rates by 25% and reduced component development time by 30% in my current role.

EXPERIENCE

Software Engineer – MERN Stack

Onxpress Transportation Partners

Feb 2024 – Present

Remote, Canada

- Built and shipped end-to-end frontend features using React.js and TypeScript across 3 production platforms, improving responsiveness and cross-device user experience.
- Designed a reusable component library with Material UI and Ant Design that cut development time by 30% and became the team's standard UI foundation.
- Developed and integrated 15+ RESTful API endpoints connecting React frontend to Node.js/Express backend, ensuring reliable and consistent data flow.
- Introduced unit testing and peer code reviews that reduced production bugs by 25% and raised overall release quality.
- Set up automated CI/CD workflows on AWS, streamlining deployment and cutting manual release overhead significantly.

Software Engineer

Miqsol Pvt. Ltd.

Jan 2023 – Jan 2024

Lahore, Pakistan

- Developed responsive React.js applications with Bootstrap and Tailwind CSS, delivering pixel-accurate layouts for 4+ client-facing products.
- Optimized frontend code and resolved persistent performance bottlenecks, improving page load times and receiving positive feedback from QA and product teams.
- Contributed to Agile sprint ceremonies and helped maintain consistent delivery cadence across cross-functional squads.

Product Designer

Miqsol Pvt. Ltd.

Jun 2022 – Jan 2023

Lahore, Pakistan

- Collaborated with developers to produce UI layouts and visual assets for 5+ early-stage products, bridging the gap between design intent and technical execution.

PROJECTS

Cash power – Online Banking Application *React.js · Node.js · Azure CI/CD*

Built a real-time transaction dashboard with responsive UI and live balance updates. Implemented Azure CI pipelines and automated test suites, **cutting deployment cycles** and reducing manual QA effort.

Eitrade – Import & Export Logistics Portal *React.js · Modular Components · Azure*

Architected a scalable logistics dashboard with modular, reusable frontend components. Leveraged Azure cloud for iterative deployments with **zero downtime** using test-driven development practices.

ADC – OnXpress Construction Portal *React.js · Node.js · AWS*

Delivered a rule-based reporting and field data validation portal for construction teams. Integrated AWS CI workflows and designed automated validation rules that **reduced manual data entry errors**.

SKILLS

- Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js, HTML5
- Styling & UI:** Tailwind CSS, Bootstrap, Material UI, Ant Design, ShadCN, Redux
- Database & APIs:** MongoDB, Mongoose, RESTful API Design & Integration
- DevOps & Tools:** Git, GitHub, Docker, AWS, Azure Pipelines, GCP, Jest, Unit Testing
- Practices:** Agile/Scrum, UI/UX Design, Code Reviews, CI/CD

EDUCATION

Virtual University of Pakistan

Bachelor of Science in Software Engineering

Aug 2021 – May 2025
