

Riha Shahzadi

MERN Stack Engineer & OpenSource Contributor

PROFESSIONAL SUMMARY

Detail-oriented and performance-driven MERN Stack Developer with over 2 years of experience in web development, specializing in building and maintaining efficient, scalable, and highly interactive applications. Proficient in React.js, Node.js, Express.js, and MongoDB, with hands-on experience in state management using Redux and Context API. Skilled in RESTful API design, database design, and implementing version control systems like Git. Known for strong problem-solving, attention to detail, and collaborative teamwork in agile settings. Passionate about applying emerging technologies to improve functionality, scalability, and code maintainability.

EXPERIENCE

Onxpress Transportation Partners

Software Engineer

Feb 2024 - Present  Remote, Canada

- Designed and delivered complex transportation systems using React and Node.js, focusing on performance, responsiveness, and scalability.
- Designed and delivered robust transportation system interfaces using ReactJS and Node.js, showcasing highly skilled full-stack development capabilities.
- Took ownership of server-side components, integrating scalable APIs and ensuring continuous integration through automated pipelines.
- Regularly participated in code reviews, fostering strong communication skills and promoting team-wide knowledge sharing.

Miqsol Pvt.Ltd

June 2022 - Jan 2024  Lahore, Pakistan

Software Engineer

Jan 2023 - Jan 2024

- Built and maintained web applications using ReactJS and Node.js, applying modern design patterns and test-driven development practices.
- Integrated RESTful APIs with PostgreSQL and MongoDB, improving performance and scalability.
- Led product features using microservices architecture, collaborating with cross-functional teams in agile sprints.
- Implemented Docker-based containerization and deployed solutions on AWS and Azure for improved CI/CD.
- Proactively addressed performance bottlenecks, leading refactoring initiatives for long-term maintenance and scalability.

Product Designer

June 2022 - Jan 2023

- Collaborated closely with developers and product designers to support early-stage software development through effective UI layouts and user-focused visuals.
- Designed visual assets and branding materials supporting various platforms and marketplace applications.

EDUCATION

Virtual University of Pakistan

Bachelor of Sciences in
Software Engineering

2021 - 2025 - 4 years, Micro Inn,
Sheikhupura, Pakistan

SKILLS

JavaScript	ReactJS
TypeScript	NodeJS
NextJS	Tailwind CSS
HTML	Express
API Integration	Bootstrap
MUI	Redux
MongoDB	Docker
MySQL	Problem Solving

MOST PROUD OF

Solved 230+ coding challenges on [LeetCode](#), strengthening data structures, algorithmic thinking, and code optimization skills.

PROJECTS

Adc - OnXpress

Railway Construction Portal

Developed a rule-based reporting and system management portal tailored for construction tracking and field data validation. Applied curiosity and enthusiasm to explore new design patterns and integrate automated CI workflows via AWS.

Eitrade

Import & Export Portal

Designed a scalable logistics dashboard with modular frontend components. Leveraged Azure cloud operations to deploy iterative updates, optimizing reliability and test-driven development outcomes.

Cashpower

Online Banking Application

Spearheaded frontend component development with real-time transaction visibility and responsive design enhancements. Implemented automated testing and CI pipelines on Azure to increase deployment efficiency.

ProsolsPortal

Railway Construction Portal

Led redesign of mobile architecture with GCP-hosted UI to support multi-device accessibility and iterative feature expansion.
